

improving working environments

Thinking Space Systems are world-renowned and trusted providers of accurate, long lasting and stylish technical furniture solutions for the security control room environment. We've served up more than fifteen university security control room upgrades over the last 10 years. Read the latest university projects and news from Thinking Space in our University Newsletter 2019...

Above and left: The new control room at Aston University

Refurbishment of Security Control Room, Aston University

Thinking Space Systems have recently provided new control room furniture for client's Aston University, following refurbishment of the security control room.

After meeting back in 2013, Aston University were impressed with the technical furniture solutions offered by Thinking Space. Having now chalked up over 15 university security control rooms around the country over the last 10 years, Thinking Space are experienced in the education sector. Their custom designed solutions mean that free-standing desks could be provided which could be easily relocated in the future.

A typical CCTV control room layout was provided, with a two operator console, media wall and supervisor console as well as custom designed storage.

"This was a complete redesign, with the focus on creating not only a user-friendly space, but a calm atmosphere essential when controlling emergency incidents"

Explained Acting Head of Security, Caroline Bluck, "Aston University recently were lucky enough to work with Thinking Space in re furnishment works of a new Security Control room. Not an easy task when accommodating a room with so much technology, and to satisfy multiple end users".

"This was a complete redesign, with the focus on creating not only a user-friendly space, but a calm atmosphere essential when controlling emergency incidents. It is not always easy to achieve both function and design, but it has been achieved here."

"I'm confident we now have the base in which to serve our community, and a space our workforce can take pride in".

Printed panel coming soon...

Thinking Space are in the process of implementing an innovative new production line. Having been awarded funding from the Solent Local Enterprise Partnership for the project last year, a new large format digital printer has been installed at the factory. This will print surface patterns and logos directly onto the panels used for all technical furniture. Our customers will have more choice and eliminates us relying on a third party for decorative vinyl finishes.

Find out more about our brand new printed panel production line by watching our series of videos in the build up to the launch at youtube.com/thinkingspacesystems/playlists.

Don't forget!

Two control room upgrades at UEA

Thinking Space have returned to the University of East Anglia once again, to provide ergonomic control room furniture for their security control rooms. Back in

2015, Thinking Space undertook the upgrade of the main control room, after meeting the then Head of Campus Support at an AUCSO conference. So pleased were security and facilities staff at their new working environment, it proved to increase morale, focus and wellbeing of their teams. "Thinking Space were professional throughout the entire project process. So easy to work with, they took all the problems away and delivered a completed project on time and on budget. The staff love working in the new environment and have a renewed focus because of it", explained Christine Beveridge, Head of Campus Support in 2015.

"Thinking Space were professional throughout the entire project process. So easy to work with, they took all our problems away!"

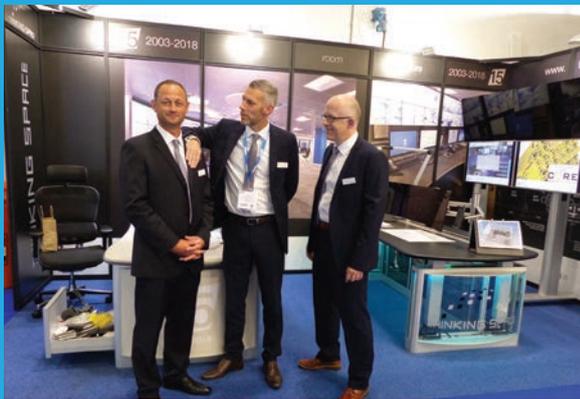

With the positive response to the first project, the UEA turned to Thinking Space once again to work their magic at the Sainsbury Centre when its' security control room required an upgrade. This world-renowned art gallery is home to the art collection of Robert and Lisa Sainsbury, as well as the Anderson Collection of Art Nouveau and the University's Abstract and Constructivist Collection as well as temporary galleries. Thinking Space were the number one choice to provide security control room furniture in the form of a two operator console and media wall.
